

Local Church Review

Statistics for Mission

Statistics for Mission is not only about statistics for your parish but also, for the first time ever, there is a complete set of digitised parish boundaries in a consistent format for the whole of Scotland. Go to the Church of Scotland's [Statistics for Mission](#) page, select 'go to the [Church Finder](#)', enter your postcode (or your church's postcode) and select 'parish statistics' from the further information column next to the church to download a PDF for your parish, which contains data from the 2011 Census.

Statistics for Mission and the companion book, "**Who is my neighbour? A user's guide to Statistics for Mission**" have been produced to help your Church understand your own community better, because the more we understand our parishes – those that live in them and their needs – the more we can serve God in being effective in mission.
